

Chananchida Akkarakit

Full-stack Developer

About Me

A fourth-year Computer Engineering student with a focus on frontend development. Skilled in translating designs into accurate and responsive user interfaces and collaborating effectively with backend teams. I am a continuous learner committed to applying my skills to create value for the organization.

- Figma
- UI Implementation
- Material UI

Backend & API

- Express.js

Database

- PostgreSQL

Development Tools & Languages

- Vite
- TypeScript
- VS Code

Soft Skills

- Leadership
- Teamwork
- Creativity
- Attention to Detail
- Flexibility
- Proactive
- Eager to learn
- Management Skills

Projects

- A work submission tracking and reporting system**
Duration: March 2025 - Present
 - Collaborated with a team to develop a work submission tracking and reporting system.
 - Developed the administrator website using React.js, Vite.js, TypeScript, and Material-UI. Additionally, I built the user mobile application using Flutter
 - Key features include real-time submission status monitoring and automated report generation for instructors.
- Personal Portfolio Website**
Duration: August 2025 - Present
 - Designed and developed a personal portfolio website to centralize my profile, projects, and contact channels for easy access.
 - Built with Next.js, Tailwind CSS, and TypeScript.
 - Live preview - [Personal Portfolio Website](#). (Link)
- Pet of Our (Mobile App UI Design)**
Duration: November 2023
 - Designed the UI/UX for a mobile application serving as a central hub for pet-related services.
 - The design enables access to services such as pet boarding, veterinary clinics, pet pharmacies, and nearby pet food stores.
